PROFESSIONAL SUMMARY

Cybersecurity professional pursuing an MSc in Advanced Networking & Cyber Security, with hands-on expertise in penetration testing, network reconnaissance, vulnerability assessment, and SOC operations. Proficient in industry-standard tools including Nmap, Wireshark, Burp Suite, ZAP and Kali Linux, with practical exposure to MITRE ATT&CK, OWASP Top 10, and NIST Cybersecurity Frameworks. Demonstrated ability to build real-world security toolkits and conduct structured vulnerability assessments through academic projects and authorized lab environments. Holds certifications including CRTOM and Microsoft AZ-900, Actively participated in college and national-level CTF competitions across platforms including TryHackMe and HackTheBox. Seeking a Cybersecurity Analyst role to contribute to real-world threat analysis, incident response, and cyber defense operations

TECHNICAL SKILLS

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Nessus, OpenVAS, OWASP ZAP

Frameworks: OWASP Top 10, MITRE ATT&CK, NIST Cybersecurity Framework

Penetration Testing: Network Scanning, Port Enumeration, Web App Testing, Vulnerability Assessment, Report Writing

Cloud & OS: AWS, Microsoft Azure, Kali Linux, Ubuntu, Windows

Version Control: Git, GitHub

PROJECTS

Password Strength Analyser — Web Application Oct 2024 – Nov 2024 github.com/simrankaur1000/password-checker-web-app

- Developed a web-based tool to evaluate password strength in real time using validation rules including length checks, character variety, and detection of common password patterns.
- Implemented instant feedback mechanism to identify weak passwords and improve user awareness around secure password practices.

Network Reconnaissance & Enumeration Toolkit —2025 Python, Kali Linux | github.com/simrankaur1000/simple-network-scanner-toolkit

- Built a unified command-line toolkit in Python that integrates 11 Kali Linux reconnaissance and enumeration tools including Nmap, Nikto, WhatWeb, Netdiscover, and ARP-scan into a single interface.
- Enables streamlined network reconnaissance workflows — replacing the need to switch between multiple tools manually during penetration testing engagements.
- Designed for educational and authorized testing use, with clear disclaimer and structured usage documentation on GitHub.

EDUCATION

MSc Advanced Networking & Cyber Security
Brainware University, Kolkata

2024 - 2026 (Expected)

Bachelor of Computer Applications (BCA)

Jyotinivas Autonomous College, Kolkata

2020 - 2023

CERTIFICATIONS & ACHIEVEMENTS

-
- **Certified Red Team Operations Management (CRTOM)** — Red Team Leaders (Jan 2026)
 - **Secured 2nd place in BRAINCON 2026 (Intra-college CTF)** — BWU (Apr 2026)
 - **Tata Cybersecurity Analyst Job Simulation** — *Forage* (Feb 2026)
 - **Microsoft Azure Fundamentals (AZ-900)** — *Microsoft* (2024)
